Bengaluru, Karnataka | [+91-9709569770](tel:+91-9709569770) | 2003rohansinha@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

Technical Skills

Languages	Python, SQL, C++, JavaScript
Machine Learning	Scikit-Learn, XGBoost, Classification, Regression, Clustering, Feature Engineering, Cross-Validation, Hyperparameter Tuning
Deep Learning & NLP	TensorFlow, CNN, LSTM, Neural Networks, TF-IDF, Sentiment Analysis, Text Classification, Prompt Engineering
Data Science	Pandas, NumPy, Matplotlib, Seaborn, EDA, Statistical Analysis
MLOps & Deployment	MLflow, DVC, FastAPI, Docker, CircleCI, CI/CD Pipelines
Cloud & Tools	AWS EC2, Azure, Databricks, Streamlit, Power BI, Git, GitHub, JIRA

Experience

Data Analyst Intern — Bhilai Steel Plant Sep 2025 – Oct 2025

- Automated data cleaning and validation pipelines using Python and SQL, reducing manual processing time by **35%** and improving data reliability across cross-functional reporting workflows.
- Designed Power BI dashboards with optimized SQL queries across **10,000+ records**, enabling real-time KPI monitoring and improving business reporting accuracy for stakeholders.

AI/ML Intern — TechSaksham (Microsoft SAP CSR Initiative) 2024

- Engineered end-to-end ML workflows covering data preprocessing, feature engineering, model training, and evaluation using Python, Pandas, NumPy, and Scikit-Learn.
- Built and validated predictive classification models applying cross-validation, model selection, and interpretability techniques to deliver production-ready ML solutions.

Projects

End-to-End ML Pipeline — Customer Churn Prediction [GitHub](#)

XGBoost · MLflow · FastAPI · Docker · AWS EC2 · CircleCI · DVC

- Built XGBoost and Random Forest churn prediction models achieving **89% accuracy**; applied SMOTE for class imbalance handling and SHAP for feature interpretability.
- Developed a full MLOps pipeline using MLflow for experiment tracking, DVC for data versioning, FastAPI for model serving, Docker for containerization, and CircleCI for CI/CD on AWS EC2.

EDA Dashboard — Interactive Sales Analytics [GitHub](#)

Streamlit · Pandas · NumPy · Statistical Analysis

- Conducted in-depth EDA on **50,000+ sales records** using hypothesis testing, correlation matrices, and outlier detection to surface actionable business insights.
- Deployed an interactive Streamlit dashboard for KPI monitoring, trend visualization, and stakeholder self-service reporting, reducing analyst report turnaround time significantly.

NLP Sentiment Analysis — Amazon Review Classifier [GitHub](#)

TensorFlow · LSTM · TF-IDF · Flask · Docker · AWS EC2

- Trained deep learning sentiment classifier on **100,000+ Amazon reviews** using LSTM and TF-IDF; improved accuracy from **82% to 91%** through architecture tuning and ensemble methods.
- Deployed Dockerized Flask REST API on AWS EC2; evaluated using F1-score, ROC-AUC, and confusion matrices to ensure robust multi-class sentiment prediction.

Education

Bachelor of Technology in Computer Science Engineering 2022 – 2026

Rungta College of Engineering and Technology CGPA: **7.6 / 10**

Certifications & Achievements

- Data Analytics Certification** – Coding Spoon | Proficiency in data analysis, visualization, and reporting workflows.
- HackIndia 2025 Participant** – GenAI Hackathon at IIT Hyderabad; developed generative AI solutions under competitive constraints.
- Solved **350+ DSA problems** on LeetCode and GeeksforGeeks; strong command of Algorithms, Graphs, Trees, and Dynamic Programming.
